

Manufacturing Tolerances for Frames

Frames for single door or pair of doors

1. Width, measured between rabbets at the head; nominal opening width $+1/18'' - 1/32''$
2. Height (total length of jamb rabbet): nominal opening height $\pm 3/64''$
3. Frames overlapping walls to have throat dimension $1/8''$ greater than dimensioned wall thickness to accommodate irregularities in wall construction
